**Election/Restriction**

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-4, drawn to an improved tennis ball, classified in class 473, subclass 604.
  - II. Claims 5-11, drawn to a method of revealing a contact location, classified in class 106, subclass 31.01.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process for using the product as claimed can be practiced with another materially different product such as an ink pen having the microcapsules thereon.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Although this is a national stage entry of PCT/US03/01951, PCT/US03/01951 claims priority to U.S. Application Number 10/055,532. A restriction was made in the U.S. Application and a restriction is deemed to be applicable in this instant application. Further, restriction

practice rules (MPEP 803) are seen as being applicable instead of lack of unity rules (MPEP 823) as the instant application claims priority to the U.S. Application 10/055,532.
